

HAPPYGLOBE CIC

We at HappyGlobe are committed to the conservation, preservation and restoration of communal and natural areas, as well as the promotion and execution of ethical waste removal.

With our friendly, passionate and outgoing team, we work with a number of similarly driven organisations to raise awareness of the negative effects we as humanity have had on our planet and to make an impact in reversing this damage.

The goal is a cleaner world for all species, the dream is that our kids won't

Sea Turtle Hatchery

Before lockdown we were in Pacuare Beach, Costa Rica, at the Latin American Sea Turtle - LAST Conservation, putting our skills to use in constructing a turtle hatchery for the season.

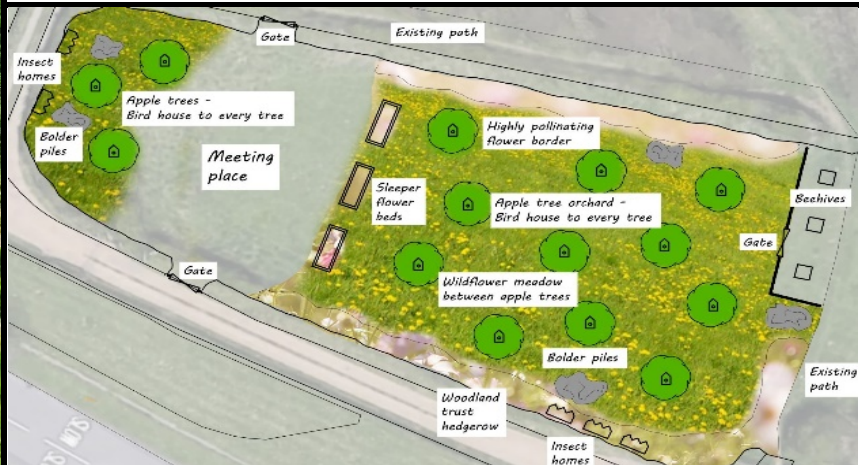

This hatchery was of our own design and features both a collapsible structure, for repeated use with little assembly required, and the all important shaded split in order to encourage a larger number of male eggs than recent years have yielded.

Conservation Meadow

We have teamed up with the Felixstowe Town Council to develop the Cowpasture Meadow into the HappyGlobe CIC Conservation Meadow. Thanks to their support, we are transforming the land into a biodiverse piece of green infrastructure, ready to host our beehives, insect homes, wildflowers and more.

Their generosity goes towards the tools and materials for landscaping, as well as the trees and hedgerow that feature on the finished meadow. Thank you for your contribution!
