

Asset Register

1. Introduction

This document details the Assets held by Felixstowe Town Council.

It is acknowledged that some of the valuation figures have been arrived at through best endeavours using the information known to us at the time. This document is reviewed on an annual basis and assets are entered, adjusted or removed as and when appropriate

This Asset Register has four main purposes.

- It forms a basis for completion of box 9 of the Council's accounting statements in the Annual Governance and Accountability Return
- It forms a basis for decisions on risk and insurance issues.
- It provides information on the age and potential lifespan of certain items.
- It provides assurance of the continued existence of Council's property

1.1 Annual Return – Fixed Assets

Items of machinery and equipment which have a useful life of more than one year and with a value greater than £500 are defined as 'Fixed Assets.' These are itemised below and their value reported in box 9 of the Council's accounting statements in the Annual Governance and Accountability Return. Council does not depreciate or adjust fixed asset values and they are not calculated as part of a balance sheet. For fixed assets Council must approve the valuation methodology which must be applied consistently year on year. The preferred value will be the original acquisition cost. Alternative acceptable valuations are the replacement cost at a particular date or an insurance cost at a particular date. A fourth method of valuation for land or buildings which are considered to be community assets will be a nominal value of £1. The fixed asset value for any individual item will not usually be altered from year to year. Therefore, a change in the total value for fixed assets (in box 9 of the Council's accounting statements) indicates the acquisition of new and/or the disposal of old assets of significance. It will be necessary to review the threshold value for fixed assets (currently £500) annually to ensure the value continues to include the types of items currently listed as fixed assets. Such a review will require the revaluation of both the current and previous years' asset registers to give a consistent basis for comparison.

1.2 Insurance Decisions

From the above it follows that not all assets are classed as 'Fixed Assets.' The guidance indicates that only items with a relatively high value which will be useful for more than one financial year are entered to the 'Fixed Asset' box 9 on the Annual Return. Council has many smaller items which individually have a replacement value less than £500 (small tools, furniture, benches etc.). These items are listed in inventories and the total for any given inventory may far exceed £500. The total value of inventories may alter quite rapidly as new items are entered or removed. It is still necessary to ensure these items are secured to the council and to assess the risks of loss so that suitable insurance may be maintained if necessary. For these

reasons the inventories are updated and reviewed annually. As a guide to these insurance decisions, an attempt will be made to maintain a replacement value for inventory items as well as for relevant fixed asset items. It will be necessary for Council to review the insurance valuation each year to ensure insurance levels remain relevant to the inventoried items.

Not all items will be insured for damage or loss since the nature of risks is not the same for all items. Damage to other items may be assessed as unlikely to occur or of insignificance cost if it does.

1.3 Replacement Decisions

Decisions to replace machinery and tools may be affected by the residual value/life of the existing equipment and the cost of replacement.

2. Summary

Total of fixed assets for annual return on 31st March 2020: **£55,501.97**. Total of fixed assets for annual return on 31st March 2021: **£70,489.23**. Variance 31st March 2020-31st March 2021 = £14,987.26 net increase in fixed assets.
